

# Accreditation Quality Report

Version: 4 Date: 8/22/2017

Welcome to the Joint Commission's Quality Report. We know how important reliable information is to you and your family when making health care decisions. This Quality Report will help you make the right decisions to meet your needs. Since 1951, the Joint Commission has been the national leader in setting standards for health care organizations. When a health care organization seeks accreditation, it demonstrates commitment to giving safe, high quality health care and to continually working to improve that care.

The Quality Report is only one way to determine whether a health care organization can meet your needs. Discuss this report with your doctor or with other professional acquaintances before making a care decision. In addition to the accreditation status of the organization, the Quality Report uses checks, pluses, and minuses in each of the following key areas to help you compare a health care organization with similar accredited organizations.

- National Patient Safety Goals safety guidelines that target the prevention of medical errors such as surgery on the wrong side of the body and safe medication use.
- National Quality Improvement Goals measures the care of patients with specific conditions such as heart failure or pregnancy.

Not all measures are relevant to or available for all types of health care organizations. The Joint Commission will add relevant measures of health care quality as more measures become available. Your comments are just as important to us. The content and format of the Quality Report will be updated from time to time based on changes in the health care industry and your suggestions. Please call Customer Service at 630-792-5800 or e-mail the Joint Commission at qualityreport@jointcommission.org with your comments and suggestions.

Mark R. Chassin, MD, MPP, MPH President of the Joint Commission

14445 Olive View Drive, Sylmar, CA

Org ID: 10054

Measure	Explanation	Hospital Results	Top 10% Scored at Least:	Average Rate:	Top 10% Scored at Least:	Average Rate:
Multiple Antipsychotic Medications at Discharge with Appropriate Justification Overall Rate	This is a proportion measure. A proportion measure is a measure which shows the number of occurrences over the entire group within which the occurrence should take place. The numerator is expressed as a subset of the denominator. This measure reports the overall number of patients discharged on two or more antipsychotic medications. Antipsychotic medications are a group of drugs used to treat psychosis. Psychosis is a mental illness that markedly interferes with a persons capacity to meet lifes everyday demands.	№0 <sup>4</sup> ————	100%	61%	100%	49%
Multiple Antipsychotic Medications at Discharge with Appropriate Justification Adults Age 18 - 64	This measure reports the number of patients age 18 through 64 years discharged on two or more antipsychotic medications for which there was an appropriate justification. Antipsychotic medications are a group of drugs used to treat psychosis. Psychosis is a mental illness that markedly interferes with a person's capacity to meet life's everyday demands. Appropriate justifications include previous attempts to control psychosis with one antipsychotic medication, a plan to reduce the number of antipsychotic medication to one antipsychotic medication or the addition of an antipsychotic medication when the patient is also being treated with Clozapine.	₩ <b>0</b> 4 ————	100%	62%	100%	48%
