Accreditation Quality Report

Version: 2 Date: 3/5/2021

Org ID: 10092

1001 Potrero Avenue, Bldg 5 Second Floor RM 2A5, San Francisco, CA

Welcome to the Joint Commission's Quality Report. We know how important reliable information is to you and your family when making health care decisions. This Quality Report will help you make the right decisions to meet your needs. Since 1951, the Joint Commission has been the national leader in setting standards for health care organizations. When a health care organization seeks accreditation, it demonstrates commitment to giving safe, high quality health care and to continually working to improve that care.

The Quality Report is only one way to determine whether a health care organization can meet your needs. Discuss this report with your doctor or with other professional acquaintances before making a care decision. In addition to the accreditation status of the organization, the Quality Report uses checks, pluses, and minuses in each of the following key areas to help you compare a health care organization with similar accredited organizations.

- National Patient Safety Goals safety guidelines that target the prevention of medical errors such as surgery on the wrong side of the body and safe medication use.
- National Quality Improvement Goals measures the care of patients with specific conditions such as heart failure or pregnancy.

Not all measures are relevant to or available for all types of health care organizations. The Joint Commission will add relevant measures of health care quality as more measures become available. Your comments are just as important to us. The content and format of the Quality Report will be updated from time to time based on changes in the health care industry and your suggestions. Please call Customer Service at 630-792-5800 or e-mail the Joint Commission at qualityreport@jointcommission.org with your comments and suggestions.

Multiple Antipsychotic Medications at Discharge with Appropriate Justification Older Adults Age 65 and Older	This measure reports the number of patients age 65 and older discharged on two or more antipsychotic medications for which there was an appropriate justification. Antipsychotic medications are a group of drugs used to treat psychosis. Psychosis is a mental illness that markedly interferes with a person's capacity to meet life's everyday demands. Appropriate justifications include previous attempts to control psychosis with one antipsychotic medication, a plan to reduce the number of antipsychotic medication to one antipsychotic medication or the addition of an antipsychotic medication when the patient is also being treated with Clozapine.	75% of 4 eligible Patients	100%	56%	100%	50%
Hours of Physical Restraint Use per 1000 Patient Hours - Overall Rate	This measure reports the total hours patients were kept in physical restraints for every 1,000 hours of patient care. Physical restraint is any manual method or physical or mechanical device, material, or equipment that immobilizes or reduces the ability of a patient to move his or her arms, legs, body or head freely when it is used as a restriction to manage a patient's behavior or restrict the patient's freedom of movement and is not a standard treatment for the patient's medical or psychiatric condition.	1.98 (826 Total Hours in Restraint)	N/A	0.48	N/A	1.13

Perinatal Care This category of evidenced based measures assesses the care of mothers and newborns.

		Соі	mpared to c	other Joint ed Organiz		n
			Nationwide	eu Organiz	ations State	wide
Measure	Explanation	Hospital Results		Average Rate:	Top 10% Scored at Least:	
Antenatal Steroids	This measure reports the overall number of mothers who were at risk of preterm delivery at 24-32 weeks gestation receiving antenatal steroids prior to delivering preterm newborns. Antenatal steroids are steroids given	100% of 11 eligible Patients	100%	98%	100%	99%
Cesarean Birth	before birth. This measure reports the number of first-time moms with a full-term, single baby in a head-down position who delivered the baby by cesarean section.	⊕	12%	25%	12%	22%
Elective Delivery	This measure reports the overall number of mothers who had elective vaginal deliveries or elective cesarean sections at equal to and greater than 37 weeks gestation to less than 39 weeks gestation. An elective delivery is the delivery of a newborn(s) when the mother was not in active labor or presented with spontaneous ruptured membranes prior to medical induction and/or cesarean section.	0% of 29 eligible Patients	0%	2%	0%	2%
Exclusive Breast Milk Feeding	This measure reports the overall number of newborns who are exclusively breast milk fed during the newborns entire hospitalization. Exclusive breast milk feeding is when a newborn receives only breast milk and no other liquids or solids except for drops or syrups consisting of vitamins, minerals, or medicines.	82% of 180 eligible Patients	73%	51%	81%	62%
Unexpected Complications in Term Newborns per 1000 livebirths - Moderate Rate	The moderate rate equals the number of patients with moderate complications.	4822.00 minutes 788 eligible
