Accreditation Quality Report

Version: 4 Date: 6/14/2017

Welcome to the Joint Commission's Quality Report. We know how important reliable information is to you and your family when making health care decisions. This Quality Report will help you make the right decisions to meet your needs. Since 1951, the Joint Commission has been the national leader in setting standards for health care organizations. When a health care organization seeks accreditation, it demonstrates commitment to giving safe, high quality health care and to continually working to improve that care.

The Quality Report is only one way to determine whether a health care organization can meet your needs. Discuss this report with your doctor or with other professional acquaintances before making a care decision. In addition to the accreditation status of the organization, the Quality Report uses checks, pluses, and minuses in each of the following key areas to help you compare a health care organization with similar accredited organizations.

- National Patient Safety Goals safety guidelines that target the
 prevention of medical errors such as surgery on the wrong side of
 the body and safe medication use.
- National Quality Improvement Goals measures the care of patients with specific conditions such as heart failure or pregnancy.

Not all measures are relevant to or available for all types of health care organizations. The Joint Commission will add relevant measures of health care quality as more measures become available. Your comments are just as important to us. The content and format of the Quality Report will be updated from time to time based on changes in the health care industry and your suggestions. Please call Customer Service at 630-792-5800 or e-mail the Joint Commission at qualityreport@jointcommission.org with your comments and suggestions.

Statewide

This category of evidence based measures assesses the overall quality of care provided to Stroke (STK) patients.

| | | Compared to other Joint Commission Accredited Organizations | | | | | |
|----------------------|---|--|--------------------------------|-------|--------------------------------|------------------|--|
| | | Nationwide | | | Statewide | | |
| Measure | Explanation | Hospital Results | Top 10% Scored at Least: | Rate: | Top 10% Scored at Least: | Average Rate: | |
| Thrombolytic Therapy | Acute ischemic stroke patients who receive a medicine that breaks up blood clots (thrombolytic therapy) within 180 minutes of stroke symptom onset. This measure reports how quickly ischemic stroke patients were given a medication that breaks up blood clots (thrombolytic therapy). Breaking up blood clots increases blood flow to the brain. If blood flow is returned to the brain quickly during a stroke, the risk of brain damage and loss of physical function is decreased. The medicine | 3 | 100% | 90% | 100% | 85% | |
