

# Accreditation Quality Report

Welcome to the Joint Commission's Quality Report. We know how important reliable information is to you and your family when making health care decisions. This Quality Report will help you make the right decisions to meet your needs. Since 1951, the Joint Commission has been the national leader in setting standards for health care organizations. When a health care organization seeks accreditation, it demonstrates commitment to giving safe, high quality health care and to continually working to improve that care.

The Quality Report is only one way to determine whether a health care organization can meet your needs. Discuss this report with your doctor or with other professional acquaintances before making a care decision. In addition to the accreditation status of the organization, the Quality Report uses checks, pluses, and minuses in each of the following key areas to help you compare a health care organization with similar accredited organizations.

- National Patient Safety Goals - safety guidelines that target the prevention of medical errors such as surgery on the wrong side of the body and safe medication use.
- National Quality Improvement Goals - measures the care of patients with specific conditions such as heart failure or pregnancy.

Not all measures are relevant to or available for all types of health care organizations. The Joint Commission will add relevant measures of health care quality as more measures become available. Your comments are just as important to us. The content and format of the Quality Report will be updated from time to time based on changes in the health care industry and your suggestions. Please call Customer Service at 630-792-5800 or e-mail the Joint Commission at [qualityreport@jointcommission.org](mailto:qualityreport@jointcommission.org) with your comments and suggestions.

Mark R. Chassin, MD, MPP, MPH  
President of the Joint Commission

## Summary of Quality Information

### Symbol Key

-  This organization achieved the best possible results.
-  This organization's performance is above the target range/value.
-  This organization's performance is similar to the target range/value.
-  This organization's performance is below the target range/value.
-  This Measure is not applicable for this organization.
-  Not displayed

### Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

### National Quality Improvement Goals:

Reporting Period:  
Jul 2011 -  
Jun 2012

Heart Attack Care

Heart Failure Care

Hospital-Based Inpatient Psychiatric Services

Pneumonia Care

Stroke Care

Surgical Care Improvement Project (SCIP)

SCIP - Cardiac

SCIP - Infection Prevention

For All Reported Procedures:

• Blood Vessel Surgery

• Colon/Large Intestine Surgery

• Coronary Artery Bypass Graft

• Hip Joint Replacement

• Hysterectomy

• Knee Replacement

• Open Heart Surgery

SCIP - Venous Thromboembolism (VTE)

Hospitals voluntarily participate in the Survey of Patients' Hospital Experiences (HCAHPS). Pediatric and psychiatric hospitals are not eligible to participate in the HCAHPS survey based on their patient population.

The Joint Commission only reports measures endorsed by the National Quality Forum.

## Locations of Care

## 2012 National Patient Safety Goals

### Symbol Key

-  The organization has met the National Patient Safety Goal.
-  The organization has not met the National Patient Safety Goal.
-  The Goal is not applicable for this organization.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

### Hospital

Safety Goals	Organizations Should	Implemented
Improve the accuracy of patient identification.	Use of Two Patient Identifiers	
	Eliminating Transfusion Errors	
Improve the effectiveness of communication among caregivers.	Timely Reporting of Critical Tests and Critical Results	
Improve the safety of using medications.	Labeling Medications	
	Reducing Harm from Anticoagulation Therapy	
	Reconciling Medication Information	
Reduce the risk of health care-associated infections.	Meeting Hand Hygiene Guidelines	
	Preventing Multi-Drug Resistant Organism Infections	
	Preventing Central-Line Associated Blood Stream Infections	
	Preventing Surgical Site Infections	
	Preventing Catheter-Associated Urinary Tract Infection	
Accurately and completely reconcile medications across the continuum of care.	Comparing Current and Newly Ordered Medications	
	Communicating Medications to the Next Provider	
	Providing a Reconciled Medication List to the Patient	
	Settings in Which Medications are Minimally Used	
The organization identifies safety risks inherent in its patient population.	Identifying Individuals at Risk for Suicide	
Universal Protocol	Conducting a Pre-Procedure Verification Process	
	Marking the Procedure Site	
	Performing a Time-Out	

## National Quality Improvement Goals

Reporting Period: July 2011 - June 2012

### Symbol Key

-  This organization achieved the best possible results
-  This organization's performance is above the target range/value.
-  This organization's performance is similar to the target range/value.
-  This organization's performance is below the target range/value.
-  Not displayed

### Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.

10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Heart Attack Care	This category of evidence based measures assesses the overall quality of care provided to Heart Attack (AMI) patients.		

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Hospital Results	Compared to other Joint Commission Accredited Organizations			
			Nationwide		Statewide	
			Top 10% Scored at Least:	Average Rate:	Top 10% Scored at Least:	Average Rate:
ACE inhibitor or ARB for LVSD*	Heart attack patients who receive either a prescription for a medicine called an "ACE inhibitor" or a medicine called an angiotensin receptor blocker (ARB) when they are discharged from the hospital. This measure reports what percent of heart attack patients who have problems with the heart pumping enough blood to the body were prescribed medicines to improve the heart's ability to pump blood.	 100% of 22 eligible Patients	100%	98%	100%	99%
Aspirin at arrival*	Heart attack patients receiving aspirin when arriving at the hospital. This measure reports what percent of heart attack patients receive aspirin within 24 hours before or after they arrive at the hospital. Aspirin is beneficial because it reduces the tendency of blood to clot in blood vessels of the heart and improves survival rates.	 99% of 208 eligible Patients	100%	99%	100%	99%
Aspirin prescribed at discharge*	Heart attack patients who receive a prescription for aspirin when being discharged from the hospital. This measure reports how often aspirin was prescribed to heart attack patients when they are leaving a hospital. Aspirin is beneficial because it reduces the tendency of blood to clot in blood vessels of the heart and improves survival rates.	 99% of 194 eligible Patients	100%	99%	100%	99%

The Joint Commission only reports measures endorsed by the National Quality Forum.

\* This information is part of the Hospital Quality Alliance. This information can also be viewed at [www.hospitalcompare.hhs.gov](http://www.hospitalcompare.hhs.gov)

---- Null value or data not displayed.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

## National Quality Improvement Goals

Reporting Period: July 2011 - June 2012

### Symbol Key

- This organization achieved the best possible results
- This organization's performance is above the target range/value.
- This organization's performance is similar to the target range/value.
- This organization's performance is below the target range/value.
- Not displayed

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Heart Attack Care	This category of evidence based measures assesses the overall quality of care provided to Heart Attack (AMI) patients.		

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Compared to other Joint Commission Accredited Organizations				
		Hospital Results	Top 10% Scored at Least:	Average Rate:	Top 10% Scored at Least:	Average Rate:
Beta blocker prescribed at discharge*	Heart attack patients who have a medicine called a "beta blocker" prescribed when they are discharged from the hospital. This measure reports what percent of heart attack patients were prescribed a special type of medicine when leaving the hospital, that has been shown to reduce further heart damage.	 99% of 186 eligible Patients	100%	99%	100%	99%
Fibrinolytic therapy received within 30 minutes of hospital arrival*	Heart attack patients who receive a medicine that breaks up blood clots (fibrinolytic therapy) within 30 minutes of hospital arrival. This measure reports how quickly heart attack patients were given a medication that breaks up blood clots (fibrinolytic therapy). Breaking up blood clots increases blood flow to the heart. If blood flow is returned to the heart muscle quickly during a heart attack, the risk of death is decreased. The medicine that breaks up clots in the arteries and allows the return of normal blood flow is called fibrinolytic therapy and is used in certain types of heart attacks. It is important that this medicine be given quickly after a heart attack is diagnosed.	3 ----	100%	63%	100%	77%

The Joint Commission only reports measures endorsed by the National Quality Forum.

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Compared to other Joint Commission Accredited Organizations				
		Hospital Results	Top 10% Scored at Least:	Average Rate:	Top 10% Scored at Least:	Average Rate:
Primary PCI received within 90 minutes of hospital arrival*	Heart attack patient with a clogged artery in the heart that is opened with a balloon therapy called PCI within 90 minutes of hospital arrival. This measure reports how quickly heart attack patients had a clogged artery in the heart opened with a balloon therapy called PCI to increase blood flow to the heart and reduce heart damage. Lack of blood supply to heart muscle can cause lasting heart damage. In certain types of heart attacks, a small balloon is threaded into a blood vessel in the heart to open up a clogged artery that keeps the blood from flowing to the heart muscle. It is important that this therapy be given quickly after a heart attack is diagnosed.	 100% of 32 eligible Patients	100%	94%	100%	95%
Statin Prescribed at Discharge	Heart attack patients who receive a prescription for a statin medication at discharge. This measure reports what percentage of heart patients who have problems with high cholesterol were prescribed medications to help reduce their "bad" cholesterol.	 98% of 182 eligible Patients	100%	98%	100%	98%

The Joint Commission only reports measures endorsed by the National Quality Forum.

Hospital-Based Inpatient Psychiatric Services	This category of evidenced based measures assesses the overall quality of care given to psychiatric patients.	 8	 8

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Compared to other Joint Commission Accredited Organizations				
		Hospital Results	Top 10% Scored at Least:	Average Rate:	Top 10% Scored at Least:	Average Rate:
Multiple Antipsychotic Medications at Discharge with Appropriate Justification Adolescents Age 13 - 17	This measure reports the number of patients age 13 through 17 years discharged on two or more antipsychotic medications for which there was an appropriate justification. Antipsychotic medications are a group of drugs used to treat psychosis. Psychosis is a mental illness that markedly interferes with a person's capacity to meet life's everyday demands. Appropriate justifications include previous attempts to control psychosis with one antipsychotic medication, a plan to reduce the number of antipsychotic medications to one antipsychotic medication or the addition of an antipsychotic medication when the patient is also being treated with Clozapine.	 4 ----	100%	45%	100%	50%

The Joint Commission only reports measures endorsed by the National Quality Forum.

Stroke Care	This category of evidence based measures assesses the overall quality of care provided to Stroke (STK) patients.		

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Compared to other Joint Commission Accredited Organizations				
		Hospital Results	Nationwide Top 10% Scored at Least:	Average Rate:	Statewide Top 10% Scored at Least:	Average Rate:
Anticoagulation Therapy for Atrial Fibrillation/Flutter	Ischemic stroke patients with atrial fibrillation/flutter who receive a prescription for an anticoagulant medication when being discharged from the hospital. This measure reports how often an anticoagulant medication was prescribed to ischemic stroke patients with atrial fibrillation/flutter when they are leaving a hospital. Atrial fibrillation is a heart rhythm disturbance that can allow blood clots to form within the upper chambers of the heart. If these blood clots break off and get into the bloodstream, a stroke can result. Anticoagulant medications or "blood thinners" help to prevent blood clots from forming.	3 89% of 9 eligible Patients <sup>3</sup>	100%	95%	100%	93%
Antithrombotic Therapy By End of Hospital Day 2	Ischemic stroke patients receiving an antithrombotic medication by the end of hospital day 2. This measure reports what percent of ischemic stroke patients receive an antithrombotic medication, such as aspirin, the day of or day after hospital arrival. Antithrombotic medications are beneficial because they reduce the tendency of blood to clot in blood vessels of the brain and improve survival rates.	 99% of 78 eligible Patients <sup>7</sup>	100%	98%	100%	98%

The Joint Commission only reports measures endorsed by the National Quality Forum.

Measure	Explanation	Compared to other Joint Commission Accredited Organizations				
		Hospital Results	Top 10% Scored at Least:	Average Rate:	Top 10% Scored at Least:	Average Rate:
Stroke Education	Stroke patients who receive specific educational material about their condition. This measure reports what percent of stroke patients are given written instructions or educational material about their condition and care when they leave the hospital. Patient education about medicines, follow-up care after discharge, risk factors for stroke, warning signs to watch for, and activation of the emergency medical system if these signs occur is important in order to prevent another stroke.	 95% of 60 eligible Patients <sup>7</sup>	100%	90%	100%	90%
Thrombolytic Therapy	Acute ischemic stroke patients who receive a medicine that breaks up blood clots (thrombolytic therapy) within 180 minutes of stroke symptom onset. This measure reports how quickly ischemic stroke patients were given a medication that breaks up blood clots (thrombolytic therapy). Breaking up blood clots increases blood flow to the brain. If blood flow is returned to the brain quickly during a stroke, the risk of brain damage and loss of physical function is decreased. The medicine that breaks up clots in the arteries and allows the return of normal blood flow is called thrombolytic therapy or "t-PA". It is important that this medicine be given quickly after an ischemic stroke is diagnosed.	 <sup>4</sup> ----	100%	75%	100%	82%

## National Quality Improvement Goals

Reporting Period: July 2011 - June 2012

### Symbol Key

- This organization achieved the best possible results
- This organization's performance is above the target range/value.
- This organization's performance is similar to the target range/value.
- This organization's performance is below the target range/value.
- Not displayed

### Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
SCIP - Infection Prevention	This category of evidence based measures assesses the overall use of indicated antibiotics for surgical infection prevention.		

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Compared to other Joint Commission Accredited Organizations				
		Hospital Results	Top 10% Scored at Least:	Average Rate:	Top 10% Scored at Least:	Average Rate:
Patients who had blood vessel surgery and received appropriate medicine that prevents infection (antibiotic) and the antibiotic was stopped within 24 hours after the surgery ended.*	This measure reports how often blood vessel surgery patients whose medicine (an antibiotic) to prevent infection was stopped within 24 hours after the surgery ended. Giving medicine that prevents infection for more than 24 hours after the end of surgery is not helpful, unless there is a specific reason (for example, fever or other signs of infection).	 100% of 8 eligible Patients <sup>7</sup>	100%	95%	100%	96%
Patients Having Colon/Large Intestine Surgery*	Overall report of hospital's performance on Surgical Infection Prevention Measures for Colon/Large Intestine Surgery.	 99% of 146 eligible Patients <sup>7</sup>	100%	95%	100%	95%
Patients having colon/large intestine surgery who received medicine to prevent infection (an antibiotic) within one hour before the skin was surgically cut.*	This measure reports how often patients having colon/large intestine surgery received medicine that prevents infection (an antibiotic) within one hour before the skin was surgically cut. Infection is lowest when patients receive antibiotics to prevent infection within one hour before the skin is surgically cut.	 100% of 49 eligible Patients <sup>7</sup>	100%	97%	100%	97%
Patients having colon/large intestine surgery who received the appropriate medicine (antibiotic) which is shown to be effective for this type of surgery.*	This measure reports how often patients who had colon/large intestine surgery were given the appropriate medicine (antibiotic) that prevents infection which is known to be effective for the type of surgery, based upon the recommendations of experts around the country.	 98% of 50 eligible Patients <sup>7</sup>	100%	94%	100%	95%

The Joint Commission only reports measures endorsed by the National Quality Forum.

## Survey of Patients' Hospital Experiences

### Footnote Key

1. Fewer than 100 patients completed the HCAHPS survey. Use these rates with caution, as the number of surveys may be too low to reliably assess hospital performance.
2. This displays less than 12 months of accurate data.
3. Survey results are not available for this period.
4. No patients were eligible for the HCAHPS Survey.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

Survey Date Range	Number of Completed Surveys	Survey Response Rate
January 2011 through December 2011	300 or More	32%

Question			Explanation					
How often did doctors communicate well with patients?			Patients reported how often their doctors communicated well with them during their hospital stay. “Communicated well” means doctors <b>explained things clearly, listened carefully</b> to the patient, and treated the patient with <b>courtesy and respect</b> .					
Doctors "always" communicated well			Doctors "usually" communicated well			Doctors "sometimes" or "never" communicated well		
Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average
82%	83%	81%	14%	13%	15%	4%	4%	4%

Question			Explanation					
How often did nurses communicate well with patients?			Patients reported how often their nurses communicated well with them during their hospital stay. “Communicated well” means nurses <b>explained things clearly, listened carefully</b> to the patient, and treated the patient with <b>courtesy and respect</b> .					
Nurses "always" communicated well			Nurses "usually" communicated well			Nurses "sometimes" or "never" communicated well		
Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average
77%	78%	77%	19%	17%	18%	4%	5%	5%

Question			Explanation					
How often did patients receive help quickly from hospital staff?			Patients reported how often they were helped quickly when they used the <b>call button</b> or needed help in <b>getting to the bathroom</b> or <b>using a bedpan</b> .					
Patients "always" received help as soon as they wanted			Patients "usually" received help as soon as they wanted			Patients "sometimes" or "never" received help as soon as they wanted		
Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average
65%	67%	65%	26%	23%	25%	9%	10%	10%

## Survey of Patients' Hospital Experiences

Survey Date Range	Number of Completed Surveys	Survey Response Rate
January 2011 through December 2011	300 or More	32%

Question			Explanation						
How often was patients' pain well controlled?			If patients needed medicine for pain during their hospital stay, the survey asked how often their pain was well controlled. "Well controlled" means their <b>pain was well controlled</b> and that the <b>hospital staff did everything they could to help</b> patients with their pain.						
Pain was "always" well controlled			Pain was "usually" well controlled			Pain was "sometimes" or "never" well controlled			
Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average	
72%	72%	70%	23%	21%	23%	5%	7%	7%	

Question			Explanation						
How often did staff explain about medicines before giving them to patients?			If patients were given medicine that they had not taken before, the survey asked how often staff explained about the medicine. "Explained" means that hospital staff told <b>what the medicine was for</b> and what <b>side effects it might have</b> before they gave it to the patient.						
Staff "always" explained			Staff "usually" explained			Staff "sometimes" or "never" explained			
Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average	
61%	64%	62%	17%	17%	18%	22%	19%	20%	

## Survey of Patients' Hospital Experiences

### Footnote Key

1. Fewer than 100 patients completed the HCAHPS survey. Use these rates with caution, as the number of surveys may be too low to reliably assess hospital performance.
2. This displays less than 12 months of accurate data.
3. Survey results are not available for this period.
4. No patients were eligible for the HCAHPS Survey.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

Survey Date Range	Number of Completed Surveys	Survey Response Rate
January 2011 through December 2011	300 or More	32%

Question			Explanation					
How often were the patients' rooms and bathrooms kept clean?			Patients reported how often their <b>hospital room and bathroom were kept clean</b> .					
Room was "always" clean			Room was "usually" clean			Room was "sometimes" or "never" clean		
Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average
76%	73%	72%	18%	18%	19%	6%	9%	9%

Question			Explanation					
How often was the area around patients' rooms kept quiet at night?			Patients reported how often <b>the area around their room was quiet at night</b> .					
"Always" quiet at night			"Usually" quiet at night			"Sometimes" or "never" quiet at night		
Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average
70%	67%	59%	24%	25%	30%	6%	8%	11%

Question			Explanation		
Were patients given information about what to do during their recovery at home?			The survey asked patients about information they were given when they were ready to leave the hospital. Patients reported whether hospital staff had <b>discussed the help they would need at home</b> . Patients also reported whether they were given <b>written information about symptoms or health problems to watch for during their recovery</b> .		
Yes, staff did give patients this information			No, staff did not give patients this information		
Hospital Rate	State Average	National Average	Hospital Rate	State Average	National Average
84%	83%	83%	16%	17%	17%
