

Accreditation Quality Report

Welcome to the Joint Commission's Quality Report. We know how important reliable information is to you and your family when making health care decisions. This Quality Report will help you make the right decisions to meet your needs. Since 1951, the Joint Commission has been the national leader in setting standards for health care organizations. When a health care organization seeks accreditation, it demonstrates commitment to giving safe, high quality health care and to continually working to improve that care.

The Quality Report is only one way to determine whether a health care organization can meet your needs. Discuss this report with your doctor or with other professional acquaintances before making a care decision. In addition to the accreditation status of the organization, the Quality Report uses checks, pluses, and minuses in each of the following key areas to help you compare a health care organization with similar accredited organizations.

- National Patient Safety Goals - safety guidelines that target the prevention of medical errors such as surgery on the wrong side of the body and safe medication use.
- National Quality Improvement Goals - measures the care of patients with specific conditions such as heart failure or pregnancy.

Not all measures are relevant to or available for all types of health care organizations. The Joint Commission will add relevant measures of health care quality as more measures become available. Your comments are just as important to us. The content and format of the Quality Report will be updated from time to time based on changes in the health care industry and your suggestions. Please call Customer Service at 630-792-5800 or e-mail the Joint Commission at qualityreport@jointcommission.org with your comments and suggestions.

Summary of Quality Information

Symbol Key

- This organization achieved the best possible results.
- This organization's performance is above the target range/value.
- This organization's performance is similar to the target range/value.
- This organization's performance is below the target range/value.
- This Measure is not applicable for this organization.
- Not displayed

Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

Accreditation Programs	Accreditation Decision	Effective Date	Last Full Survey Date	Last On-Site Survey Date
Hospital	Preliminary Denial of Accreditation	10/8/2021	10/8/2021	11/17/2021

The following standard(s) were found to be out of compliance:

- A pharmacist reviews the appropriateness of all medication orders for medications to be dispensed in the hospital.
- A time-out is performed before the procedure.
- As part of its Emergency Operations Plan, the hospital prepares for how it will manage utilities during an emergency.
- Before the hospital discharges or transfers a patient, it informs and educates the patient about his or her follow-up care, treatment, and services.
- Building and fire protection features are designed and maintained to minimize the effects of fire, smoke, and heat.
- Building and fire protection features are designed and maintained to minimize the effects of fire, smoke, and heat.
- Care, treatment, and services provided through contractual agreement are provided safely and effectively.
- Label all medications, medication containers, and other solutions on and off the sterile field in perioperative and other procedural settings. Note: Medication containers include syringes, medicine cups, and basins.
- Ongoing professional practice evaluation information is factored into the decision to maintain existing privilege(s), to revise existing privilege(s), or to revoke an existing privilege prior to or at the time of renewal.
- Reduce the likelihood of harm related to maternal hemorrhage.
- Reduce the likelihood of harm related to maternal severe hypertension/preeclampsia.
- Reduce the risk for suicide. Note: EPs 2–7 apply to patients in psychiatric hospitals or patients being evaluated or treated for behavioral health conditions as their primary reason for care. In addition, EPs 3–7 apply to all patients who express suicidal ideation during the course of care.
- Staff are competent to perform their responsibilities.
- The governing body is ultimately accountable for the safety and quality of care, treatment, and services.
- The hospital assesses and manages the patient's pain and minimizes the risks associated with treatment.
- The hospital assesses and reassesses its patients.
- The hospital assesses the needs of patients who receive psychosocial services to treat alcoholism or other substance use disorders.
- The hospital conducts fire drills.
- The hospital designs and manages the physical environment to comply with the Life Safety Code.
- The hospital documents the use of restraint or seclusion.
- The hospital establishes and maintains a safe, functional environment. Note: The environment is constructed, arranged, and maintained to foster patient safety, provide facilities for diagnosis and treatment, and provide for special services appropriate to the needs of the community.
- The hospital has policies and procedures that guide and support patient care, treatment, and services.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

- The hospital identifies the individual(s) responsible for the infection prevention and control program.
- The hospital implements its infection prevention and control plan.
- The hospital inspects, tests, and maintains emergency power systems. Note: This standard does not require hospitals to have the types of emergency power equipment discussed below. However, if these types of equipment exist within the building, then the following maintenance, testing, and inspection requirements apply.
- The hospital inspects, tests, and maintains medical equipment.
- The hospital inspects, tests, and maintains medical gas and vacuum systems. Note: This standard does not require hospitals to have the medical gas and vacuum systems discussed below. However, if a hospital has these types of systems, then the following inspection, testing, and maintenance requirements apply.
- The hospital inspects, tests, and maintains utility systems. Note: At times, maintenance is performed by an external service. In these cases, hospitals are not required to possess maintenance documentation but must have access to such documentation during survey and as needed.
- The hospital maintains complete and accurate medical records for each individual patient.
- The hospital maintains fire safety equipment and fire safety building features. Note: This standard does not require hospitals to have the types of fire safety equipment and building features described below. However, if these types of equipment or features exist within the building, then the following maintenance, testing, and inspection requirements apply.
- The hospital maintains the integrity of the means of egress.
- The hospital makes food and nutrition products available to its patients.
- The hospital manages fire risks.
- The hospital manages medical equipment risks.
- The hospital manages risks associated with its utility systems.
- The hospital manages risks related to hazardous materials and waste.
- The hospital notifies the public it serves about how to contact its hospital management and The Joint Commission to report concerns about patient safety and quality of care. Note: Methods of notice may include, but are not limited to, distribution of information about The Joint Commission, including contact information in published materials such as brochures and/or posting this information on the hospital's website.
- The hospital plans the patient's care.
- The hospital provides and maintains building features to protect individuals from the hazards of fire and smoke.
- The hospital provides and maintains building features to protect individuals from the hazards of fire and smoke.
- The hospital provides and maintains equipment for extinguishing fires.
- The hospital provides and maintains fire alarm systems.
- The hospital provides and maintains systems for extinguishing fires.
- The hospital provides care to the patient after operative or other high-risk procedures and/or the administration of moderate or deep sedation or anesthesia.
- The hospital provides care, treatment, services, and an environment that pose no risk of an "Immediate Threat to Health or Safety."
- The hospital reduces the risk of infections associated with medical equipment, devices, and supplies.
- The hospital respects, protects, and promotes patient rights.
- The hospital safely administers medications.
- The hospital safely stores medications.
- The hospital uses restraint or seclusion safely.
- The organized medical staff defines the circumstances requiring monitoring and evaluation of a practitioner's professional performance.
- The patient and his or her family have the right to have complaints reviewed by the hospital.
- The patient's medical record contains documentation on any operative or other high-risk procedures and the use of moderate or deep sedation or anesthesia.

2021 National Patient Safety Goals

Symbol Key

-  The organization has met the National Patient Safety Goal.
-  The organization has not met the National Patient Safety Goal.
-  The Goal is not applicable for this organization.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

Hospital

Safety Goals	Organizations Should	Implemented
Improve the accuracy of patient identification.	Use of Two Patient Identifiers	
Improve the effectiveness of communication among caregivers.	Timely Reporting of Critical Tests and Critical Results	
Improve the safety of using medications.	Labeling Medications	
	Reducing Harm from Anticoagulation Therapy	
	Reconciling Medication Information	
Reduce the harm associated with clinical alarm systems.	Use Alarms Safely on Medical Equipment	
Reduce the risk of health care-associated infections.	Meeting Hand Hygiene Guidelines	
The organization identifies safety risks inherent in its patient population.	Identifying Individuals at Risk for Suicide	
Universal Protocol	Conducting a Pre-Procedure Verification Process	
	Marking the Procedure Site	
	Performing a Time-Out	

National Quality Improvement Goals

Reporting Period: January 2020 - December 2020

Symbol Key

- This organization achieved the best possible results
- This organization's performance is above the target range/value.
- This organization's performance is similar to the target range/value.
- This organization's performance is below the target range/value.
- Not displayed

Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Perinatal Care	This category of evidenced based measures assesses the care of mothers and newborns.	2	2

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Hospital Results	Nationwide		Statewide	
			Top 10% Scored at Least:	Average Rate:	Top 10% Scored at Least:	Average Rate:
Cesarean Birth	This measure reports the number of first-time moms with a full-term, single baby in a head-down position who delivered the baby by cesarean section.	32% of 587 eligible Patients	16%	25%	20%	28%
Elective Delivery	This measure reports the overall number of mothers who had elective vaginal deliveries or elective cesarean sections at equal to and greater than 37 weeks gestation to less than 39 weeks gestation. An elective delivery is the delivery of a newborn(s) when the mother was not in active labor or presented with spontaneous ruptured membranes prior to medical induction and/or cesarean section.	8 6% of 145 eligible Patients	0%	2%	0%	1%
Exclusive Breast Milk Feeding	This measure reports the overall number of newborns who are exclusively breast milk fed during the newborns entire hospitalization. Exclusive breast milk feeding is when a newborn receives only breast milk and no other liquids or solids except for drops or syrups consisting of vitamins, minerals, or medicines.	8 32% of 1677 eligible Patients	71%	51%	60%	39%
Unexpected Complications in Term Newborns per 1000 livebirths - Moderate Rate	The moderate rate equals the number of patients with moderate complications.	8 2896% of 1726 eligible Patients	200%	1800%	400%	2100%
Unexpected Complications in Term Newborns per 1000 livebirths - Overall Rate	This measure looks at the number of full-term single babies with a normal birth weight and with no preexisting conditions, these are babies that are expected to do well and routinely go home with the mother.	8 4229% of 1726 eligible Patients	1500%	3100%	1500%	3300%

The Joint Commission only reports measures endorsed by the National Quality Forum.
