

## Accreditation Quality Report

Welcome to the Joint Commission's Quality Report. We know how important reliable information is to you and your family when making health care decisions. This Quality Report will help you make the right decisions to meet your needs. Since 1951, the Joint Commission has been the national leader in setting standards for health care organizations. When a health care organization seeks accreditation, it demonstrates commitment to giving safe, high quality health care and to continually working to improve that care.

The Quality Report is only one way to determine whether a health care organization can meet your needs. Discuss this report with your doctor or with other professional acquaintances before making a care decision. In addition to the accreditation status of the organization, the Quality Report uses checks, pluses, and minuses in each of the following key areas to help you compare a health care organization with similar accredited organizations.

- National Patient Safety Goals - safety guidelines that target the prevention of medical errors such as surgery on the wrong side of the body and safe medication use.
- National Quality Improvement Goals - measures the care of patients with specific conditions such as heart failure or pregnancy.

Not all measures are relevant to or available for all types of health care organizations. The Joint Commission will add relevant measures of health care quality as more measures become available. Your comments are just as important to us. The content and format of the Quality Report will be updated from time to time based on changes in the health care industry and your suggestions. Please call Customer Service at 630-792-5800 or e-mail the Joint Commission at [qualityreport@jointcommission.org](mailto:qualityreport@jointcommission.org) with your comments and suggestions.

Mark R. Chassin, MD, MPP, MPH  
President of the Joint Commission

## Summary of Quality Information

### Symbol Key

- This organization achieved the best possible results.
- This organization's performance is above the target range/value.
- This organization's performance is similar to the target range/value.
- This organization's performance is below the target range/value.
- This Measure is not applicable for this organization.
- Not displayed

### Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

## 2014 National Patient Safety Goals

### Symbol Key

-  The organization has met the National Patient Safety Goal.
-  The organization has not met the National Patient Safety Goal.
-  The Goal is not applicable for this organization.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

### Hospital

Safety Goals	Organizations Should	Implemented
Improve the accuracy of patient identification.	Use of Two Patient Identifiers	
	Eliminating Transfusion Errors	
Improve the effectiveness of communication among caregivers.	Timely Reporting of Critical Tests and Critical Results	
Improve the safety of using medications.	Labeling Medications	
	Reducing Harm from Anticoagulation Therapy	
	Reconciling Medication Information	
Use Alarms Safely	Use Alarms Safely on Medical Equipment	
Reduce the risk of health care-associated infections.	Meeting Hand Hygiene Guidelines	
	Preventing Multi-Drug Resistant Organism Infections	
	Preventing Central-Line Associated Blood Stream Infections	
	Preventing Surgical Site Infections	
The organization identifies safety risks inherent in its patient population.	Preventing Catheter-Associated Urinary Tract Infection	
	Identifying Individuals at Risk for Suicide	
Universal Protocol	Conducting a Pre-Procedure Verification Process	
	Marking the Procedure Site	
	Performing a Time-Out	

## National Quality Improvement Goals

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Heart Attack Care	This category of evidence based measures assesses the overall quality of care provided to Heart Attack (AMI) patients.	<sup>2</sup>	<sup>2</sup>

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Compared to other Joint Commission Accredited Organizations				
		Hospital Results	Nationwide	Average Rate:	Statewide	Average Rate:
Fibrinolytic therapy received within 30 minutes of hospital arrival*	Heart attack patients who receive a medicine that breaks up blood clots (fibrinolytic therapy) within 30 minutes of hospital arrival. This measure reports how quickly heart attack patients were given a medication that breaks up blood clots (fibrinolytic therapy). Breaking up blood clots increases blood flow to the heart. If blood flow is returned to the heart muscle quickly during a heart attack, the risk of death is decreased. The medicine that breaks up clots in the arteries and allows the return of normal blood flow is called fibrinolytic therapy and is used in certain types of heart attacks. It is important that this medicine be given quickly after a heart attack is diagnosed.*	<sup>3</sup> ---	Top 10% Scored at Least: 91%	Average Rate: 53%	Top 10% Scored at Least: ---- <sup>3</sup>	Average Rate: ---- <sup>3</sup>

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Stroke Care	This category of evidence based measures assesses the overall quality of care provided to Stroke (STK) patients.	8	8

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Compared to other Joint Commission Accredited Organizations				
		Hospital Results	Nationwide Top 10% Scored at Least:	Average Rate:	Statewide Top 10% Scored at Least:	Average Rate:
Anticoagulation Therapy for Atrial Fibrillation/Flutter	Ischemic stroke patients with atrial fibrillation/flutter who receive a prescription for an anticoagulant medication when being discharged from the hospital. This measure reports how often an anticoagulant medication was prescribed to ischemic stroke patients with atrial fibrillation/flutter when they are leaving a hospital. Atrial fibrillation is a heart rhythm disturbance that can allow blood clots to form within the upper chambers of the heart. If these blood clots break off and get into the bloodstream, a stroke can result. Anticoagulant medications or "blood thinners" help to prevent blood clots from forming.	8 100% of 3 eligible Patients	100%	97%	100%	97%
Antithrombotic Therapy By End of Hospital Day 2	Ischemic stroke patients receiving an antithrombotic medication by the end of hospital day 2. This measure reports what percent of ischemic stroke patients receive an antithrombotic medication, such as aspirin, the day of or day after hospital arrival. Antithrombotic medications are beneficial because they reduce the tendency of blood to clot in blood vessels of the brain and improve survival rates.	8 100% of 20 eligible Patients	100%	98%	100%	98%

The Joint Commission only reports measures endorsed by the National Quality Forum.

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Venous Thromboembolism (VTE)	This category of evidence-based measures assesses the overall quality of care related to prevention and treatment of blood clots.		

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Hospital Results	Compared to other Joint Commission Accredited Organizations			
			Top 10% Scored at Least:	Average Rate:	Top 10% Scored at Least:	Average Rate:
Intensive Care Unit (ICU) VTE Prophylaxis	Medical and surgical patients who were admitted or transferred to the ICU who received treatment to prevent VTE or a reason why they did not need preventive care was documented. This measure reports the percent of patients who received treatment to prevent blood clots or had documentation regarding preventive care at ICU admission or transfer.	 100% of 117 eligible Patients	100%	97%	100%	98%
VTE Discharge Instructions	Patients with blood clots who were discharged to home, home with home health, home hospice or discharged/transferred to court/law enforcement on a blood thinning medication with written information. This measure reports the percent of patients who went home on warfarin who received instructions about compliance issues, dietary advice, follow-up monitoring and information about the potential for adverse drug reactions/interactions.	 100% of 7 eligible Patients	100%	92%	100%	95%
VTE Patients with Anticoagulation Overlap Therapy	Patients with blood clots who received two medications for treatment. This measure reports the percent of patients who received an overlap of medication for a specific timeframe, or who went home on both medications.	 100% of 14 eligible Patients	100%	94%	100%	95%

The Joint Commission only reports measures endorsed by the National Quality Forum.

## National Quality Improvement Goals

Reporting Period: July 2014 - June 2015

### Symbol Key

- This organization achieved the best possible results
- This organization's performance is above the target range/value.
- This organization's performance is similar to the target range/value.
- This organization's performance is below the target range/value.
- Not displayed

### Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.
