

# Accreditation Quality Report

Welcome to the Joint Commission's Quality Report. We know how important reliable information is to you and your family when making health care decisions. This Quality Report will help you make the right decisions to meet your needs. Since 1951, the Joint Commission has been the national leader in setting standards for health care organizations. When a health care organization seeks accreditation, it demonstrates commitment to giving safe, high quality health care and to continually working to improve that care.

The Quality Report is only one way to determine whether a health care organization can meet your needs. Discuss this report with your doctor or with other professional acquaintances before making a care decision. In addition to the accreditation status of the organization, the Quality Report uses checks, pluses, and minuses in each of the following key areas to help you compare a health care organization with similar accredited organizations.

- National Patient Safety Goals - safety guidelines that target the prevention of medical errors such as surgery on the wrong side of the body and safe medication use.
- National Quality Improvement Goals - measures the care of patients with specific conditions such as heart failure or pregnancy.

Not all measures are relevant to or available for all types of health care organizations. The Joint Commission will add relevant measures of health care quality as more measures become available. Your comments are just as important to us. The content and format of the Quality Report will be updated from time to time based on changes in the health care industry and your suggestions. Please call Customer Service at 630-792-5800 or e-mail the Joint Commission at [qualityreport@jointcommission.org](mailto:qualityreport@jointcommission.org) with your comments and suggestions.

## Summary of Quality Information

### Symbol Key

-  This organization achieved the best possible results.
-  This organization's performance is better than the target range/value.
-  This organization's performance is similar to the target range/value.
-  This organization's performance is worse than the target range/value.
-  This Measure is not applicable for this organization.
-  Not displayed

### Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.
12. The measure rate is within optimal range.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

## 2022 National Patient Safety Goals

### Symbol Key

-  The organization has met the National Patient Safety Goal.
-  The organization has not met the National Patient Safety Goal.
-  The Goal is not applicable for this organization.

### Behavioral Health Care and Human Services

Safety Goals	Organizations Should	Implemented
Improve the accuracy of the identification of individuals served.	Use of Two Identifiers	
Improve the safety of using medications.	Reconciling Medication Information	
Reduce the risk of health care-associated infections.	Meeting Hand Hygiene Guidelines	
The organization identifies safety risks inherent in the population of the individuals it serves.	Identifying Individuals at Risk for Suicide	

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

## 2022 National Patient Safety Goals

### Symbol Key

-  The organization has met the National Patient Safety Goal.
-  The organization has not met the National Patient Safety Goal.
-  The Goal is not applicable for this organization.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

### Hospital

Safety Goals	Organizations Should	Implemented
Improve the accuracy of patient identification.	Use of Two Patient Identifiers	
Improve the effectiveness of communication among caregivers.	Timely Reporting of Critical Tests and Critical Results	
Improve the safety of using medications.	Labeling Medications	
	Reducing Harm from Anticoagulation Therapy	
	Reconciling Medication Information	
Reduce the harm associated with clinical alarm systems.	Use Alarms Safely on Medical Equipment	
Reduce the risk of health care-associated infections.	Meeting Hand Hygiene Guidelines	
The organization identifies safety risks inherent in its patient population.	Identifying Individuals at Risk for Suicide	
Universal Protocol	Conducting a Pre-Procedure Verification Process	
	Marking the Procedure Site	
	Performing a Time-Out	

## National Quality Improvement Goals

Hospital-Based Inpatient Psychiatric Services	This category of evidenced based measures assesses the overall quality of care given to psychiatric patients.	 <sup>2</sup>	 <sup>2</sup>

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Compared to other Joint Commission Accredited Organizations				
		Hospital Results	Nationwide	Average Rate:	Statewide	Average Rate:
Assessment of violence risk, substance use disorder, trauma and patient strengths completed - Overall Rate	This measure reports the overall number of patients screened for violence risk to self and others, substance and alcohol use, psychological trauma history and patient strengths. Screening for violence risk to self determines if patients are likely to harm themselves. Screening for violence risk to others determines if patients are likely to harm others. Screening for substance and alcohol use determines if patients need help for their use. Screening for psychological trauma history determines if patients have experienced terrible events in their lives which have left them fearful or anxious and unable to handle their feelings. Screening for patient strengths identifies positive things such as family support, a steady job, housing, etc. which are used to help the patient recover.	 <sup>2</sup>  99% of 994 eligible Patients	100%	95%	100%	99%

Measure	Explanation	Compared to other Joint Commission Accredited Organizations				
		Hospital Results	Top Performer Threshold:	Average Rate:	Top Performer Threshold:	Average Rate:
Multiple Antipsychotic Medications at Discharge with Appropriate Justification Overall Rate	This is a proportion measure. A proportion measure is a measure which shows the number of occurrences over the entire group within which the occurrence should take place. The numerator is expressed as a subset of the denominator. This measure reports the overall number of patients discharged on two or more antipsychotic medications. Antipsychotic medications are a group of drugs used to treat psychosis. Psychosis is a mental illness that markedly interferes with a person's capacity to meet life's everyday demands.	<sup>2</sup> 21% of 14 eligible Patients	100%	53%	93%	57%
Multiple Antipsychotic Medications at Discharge with Appropriate Justification Children Age 1 - 12	This measure reports the number of patients age 1 through 12 years discharged on two or more antipsychotic medications for which there was an appropriate justification. Antipsychotic medications are a group of drugs used to treat psychosis. Psychosis is a mental illness that markedly interferes with a person's capacity to meet life's everyday demands. Appropriate justifications include previous attempts to control psychosis with one antipsychotic medication, a plan to reduce the number of antipsychotic medications to one antipsychotic medication or the addition of an antipsychotic medication when the patient is also being treated with Clozapine.	<sup>3</sup> ----	100%	34%	----	---- <sup>3</sup>

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.
12. The measure rate is within optimal range.

Multiple Antipsychotic Medications at Discharge with Appropriate Justification Adults Age 18 - 64	This measure reports the number of patients age 18 through 64 years discharged on two or more antipsychotic medications for which there was an appropriate justification. Antipsychotic medications are a group of drugs used to treat psychosis. Psychosis is a mental illness that markedly interferes with a person's capacity to meet life's everyday demands. Appropriate justifications include previous attempts to control psychosis with one antipsychotic medication, a plan to reduce the number of antipsychotic medications to one antipsychotic medication or the addition of an antipsychotic medication when the patient is also being treated with Clozapine.	 23% of 13 eligible Patients	100%	56%	93%	59%

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Perinatal Care	This category of evidenced based measures assesses the care of mothers and newborns.	2	2

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Hospital Results	Nationwide		Statewide	
			Top Performer Threshold:	Average Rate:	Top Performer Threshold:	Average Rate:
Cesarean Birth	This measure reports the number of first-time moms with a full-term, single baby in a head-down position who delivered the baby by cesarean section.	 32% of 222 eligible Patients	12	26%	12	28%
Elective Delivery	This measure reports the overall number of mothers who had elective vaginal deliveries or elective cesarean sections at equal to and greater than 37 weeks gestation. An elective delivery is the delivery of a newborn(s) when the mother was not in active labor or presented with spontaneous ruptured membranes prior to medical induction and/or cesarean section.	 3% of 61 eligible Patients	0%	2%	0%	2%
Exclusive Breast Milk Feeding	This measure reports the overall number of newborns who are exclusively breast milk fed during the newborns entire hospitalization. Exclusive breast milk feeding is when a newborn receives only breast milk and no other liquids or solids except for drops or syrups consisting of vitamins, minerals, or medicines.	 35% of 573 eligible Patients	71%	49%	52%	36%
Unexpected Complications in Term Newborns per 1000 livebirths - Severe Rate	The severe rate equals the number of patients with severe complications.	 26 per 1000	5	13	6	12
