

# Accreditation Quality Report

---

Welcome to the Joint Commission's Quality Report. We know how important reliable information is to you and your family when making health care decisions. This Quality Report will help you make the right decisions to meet your needs. Since 1951, the Joint Commission has been the national leader in setting standards for health care organizations. When a health care organization seeks accreditation, it demonstrates commitment to giving safe, high quality health care and to continually working to improve that care.

The Quality Report is only one way to determine whether a health care organization can meet your needs. Discuss this report with your doctor or with other professional acquaintances before making a care decision. In addition to the accreditation status of the organization, the Quality Report uses checks, pluses, and minuses in each of the following key areas to help you compare a health care organization with similar accredited organizations.

- National Patient Safety Goals - safety guidelines that target the prevention of medical errors such as surgery on the wrong side of the body and safe medication use.
- National Quality Improvement Goals - measures the care of patients with specific conditions such as heart failure or pregnancy.

Not all measures are relevant to or available for all types of health care organizations. The Joint Commission will add relevant measures of health care quality as more measures become available. Your comments are just as important to us. The content and format of the Quality Report will be updated from time to time based on changes in the health care industry and your suggestions. Please call Customer Service at 630-792-5800 or e-mail the Joint Commission at [qualityreport@jointcommission.org](mailto:qualityreport@jointcommission.org) with your comments and suggestions.

Mark R. Chassin, MD, MPP, MPH  
President of the Joint Commission

## Summary of Quality Information

### Symbol Key

- This organization achieved the best possible results.
- This organization's performance is above the target range/value.
- This organization's performance is similar to the target range/value.
- This organization's performance is below the target range/value.
- This Measure is not applicable for this organization.
- Not displayed

### Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

## 2016 National Patient Safety Goals

### Symbol Key

-  The organization has met the National Patient Safety Goal.
-  The organization has not met the National Patient Safety Goal.
-  The Goal is not applicable for this organization.

### Home Care

Safety Goals	Organizations Should	Implemented
Improve the accuracy of patient identification.	Use of Two Patient Identifiers	
Improve the safety of using medications.	Reconciling Medication Information	
Reduce the risk of health care-associated infections.	Meeting Hand Hygiene Guidelines	
Reduce the risk of patient harm resulting from falls.	Implementing a Fall Reduction Program	
The organization identifies safety risks inherent in its patient population.	Identifying Risks Associated with Home Oxygen	

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

## 2017 National Patient Safety Goals

### Symbol Key

-  The organization has met the National Patient Safety Goal.
-  The organization has not met the National Patient Safety Goal.
-  The Goal is not applicable for this organization.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

### Hospital

Safety Goals	Organizations Should	Implemented
Improve the accuracy of patient identification.	Use of Two Patient Identifiers	
	Eliminating Transfusion Errors	
Improve the effectiveness of communication among caregivers.	Timely Reporting of Critical Tests and Critical Results	
Improve the safety of using medications.	Labeling Medications	
	Reducing Harm from Anticoagulation Therapy	
	Reconciling Medication Information	
Reduce the harm associated with clinical alarm systems.	Use Alarms Safely on Medical Equipment	
Reduce the risk of health care-associated infections.	Meeting Hand Hygiene Guidelines	
	Preventing Multi-Drug Resistant Organism Infections	
	Preventing Central-Line Associated Blood Stream Infections	
	Preventing Surgical Site Infections	
	Preventing Catheter-Associated Urinary Tract Infection	
The organization identifies safety risks inherent in its patient population.	Identifying Individuals at Risk for Suicide	
Universal Protocol	Conducting a Pre-Procedure Verification Process	
	Marking the Procedure Site	
	Performing a Time-Out	

## National Quality Improvement Goals

Reporting Period: October 2015 - September 2016

### Symbol Key

-  This organization achieved the best possible results
-  This organization's performance is above the target range/value.
-  This organization's performance is similar to the target range/value.
-  This organization's performance is below the target range/value.
-  Not displayed

### Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Emergency Department	This category of evidence based measures assesses the time patients remain in the hospital Emergency Department prior to inpatient admission.	 2	 2

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Hospital Results	Compared to other Joint Commission Accredited Organizations			
			Nationwide	Weighted	Statewide	Weighted
			Top 10% Scored at Most:	Median:	Top 10% Scored at Most:	Median:
Admit Decision Time to ED Departure Time for Admitted Patients	The amount of time (in minutes) it takes from the time the physician decides to admit a patient into the hospital from the Emergency Department until the patient actually leaves the ED to go to the inpatient unit.	 2 149.00 minutes 1215 eligible Patients	53.00	124.00	50.77	114.59
Median Time from ED Arrival to ED Departure for Admitted ED Patients	The amount of time (in minutes) from the time the patient arrives in the Emergency Department until the patient is admitted as an inpatient into the hospital.	 2 389.00 minutes 1216 eligible Patients	202.00	311.00	221.31	300.24

The Joint Commission only reports measures endorsed by the National Quality Forum.

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Perinatal Care	This category of evidenced based measures assesses the care of mothers and newborns.	2	2

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Hospital Results	Nationwide		Statewide	
			Top 10% Scored at Least:	Average Rate:	Top 10% Scored at Least:	Average Rate:
Antenatal Steroids	This measure reports the overall number of mothers who were at risk of preterm delivery at 24-32 weeks gestation receiving antenatal steroids prior to delivering preterm newborns. Antenatal steroids are steroids given before birth.	 100% of 137 eligible Patients	100%	98%	100%	99%
Elective Delivery	This measure reports the overall number of mothers who had elective vaginal deliveries or elective cesarean sections at equal to and greater than 37 weeks gestation. An elective delivery is the delivery of a newborn(s) when the mother was not in active labor or presented with spontaneous ruptured membranes prior to medical induction and/or cesarean section.	 1% of 285 eligible Patients	0%	2%	0%	1%
Exclusive Breast Milk Feeding	This measure reports the overall number of newborns who are exclusively breast milk fed during the newborns entire hospitalization. Exclusive breast milk feeding is when a newborn receives only breast milk and no other liquids or solids except for drops or syrups consisting of vitamins, minerals, or medicines.	 55% of 3345 eligible Patients	75%	53%	70%	50%

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Stroke Care	This category of evidence based measures assesses the overall quality of care provided to Stroke (STK) patients.	 2	 2

Compared to other Joint Commission Accredited Organizations

Measure	Explanation					
		Hospital Results	Nationwide Top 10% Scored at Least:	Average Rate:	Statewide Top 10% Scored at Least:	Average Rate:
Thrombolytic Therapy	Acute ischemic stroke patients who receive a medicine that breaks up blood clots (thrombolytic therapy) within 180 minutes of stroke symptom onset. This measure reports how quickly ischemic stroke patients were given a medication that breaks up blood clots (thrombolytic therapy). Breaking up blood clots increases blood flow to the brain. If blood flow is returned to the brain quickly during a stroke, the risk of brain damage and loss of physical function is decreased. The medicine that breaks up clots in the arteries and allows the return of normal blood flow is called thrombolytic therapy or "t-PA". It is important that this medicine be given quickly after an ischemic stroke is diagnosed.	 97% of 39 eligible Patients	100%	90%	100%	90%
