

Accreditation Quality Report

Welcome to the Joint Commission's Quality Report. We know how important reliable information is to you and your family when making health care decisions. This Quality Report will help you make the right decisions to meet your needs. Since 1951, the Joint Commission has been the national leader in setting standards for health care organizations. When a health care organization seeks accreditation, it demonstrates commitment to giving safe, high quality health care and to continually working to improve that care.

The Quality Report is only one way to determine whether a health care organization can meet your needs. Discuss this report with your doctor or with other professional acquaintances before making a care decision. In addition to the accreditation status of the organization, the Quality Report uses checks, pluses, and minuses in each of the following key areas to help you compare a health care organization with similar accredited organizations.

- National Patient Safety Goals - safety guidelines that target the prevention of medical errors such as surgery on the wrong side of the body and safe medication use.
- National Quality Improvement Goals - measures the care of patients with specific conditions such as heart failure or pregnancy.

Not all measures are relevant to or available for all types of health care organizations. The Joint Commission will add relevant measures of health care quality as more measures become available. Your comments are just as important to us. The content and format of the Quality Report will be updated from time to time based on changes in the health care industry and your suggestions. Please call Customer Service at 630-792-5800 or e-mail the Joint Commission at qualityreport@jointcommission.org with your comments and suggestions.

Mark R. Chassin, MD, MPP, MPH
President of the Joint Commission

Summary of Quality Information

Symbol Key

-  This organization achieved the best possible results.
-  This organization's performance is above the target range/value.
-  This organization's performance is similar to the target range/value.
-  This organization's performance is below the target range/value.
-  This Measure is not applicable for this organization.
-  Not displayed

Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Perinatal Care	This category of evidenced based measures assesses the care of mothers and newborns.		

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Hospital Results	Nationwide		Statewide	
			Top 10% Scored at Least:	Average Rate:	Top 10% Scored at Least:	Average Rate:
Antenatal Steroids	This measure reports the overall number of mothers who were at risk of preterm delivery at 24-32 weeks gestation receiving antenatal steroids prior to delivering preterm newborns. Antenatal steroids are steroids given before birth.	 100% of 109 eligible Patients	100%	96%	100%	99%
Elective Delivery	This measure reports the overall number of mothers who had elective vaginal deliveries or elective cesarean sections at equal to and greater than 37 weeks gestation. An elective delivery is the delivery of a newborn(s) when the mother was not in active labor or presented with spontaneous ruptured membranes prior to medical induction and/or cesarean section.	 2% of 202 eligible Patients	0%	3%	0%	2%
Exclusive Breast Milk Feeding	This measure reports the overall number of newborns who are exclusively breast milk fed during the newborns entire hospitalization. Exclusive breast milk feeding is when a newborn receives only breast milk and no other liquids or solids except for drops or syrups consisting of vitamins, minerals, or medicines.	 40% of 372 eligible Patients	76%	51%	77%	60%
Exclusive Breast Milk Feeding Considering Mothers Choice	This measure reports the overall number of newborns who are exclusively breast milk fed during the newborns entire hospitalization not including those newborns whose mothers chose to not exclusively feed breast milk at the time of birth of the newborn.	 41% of 362 eligible Patients	90%	66%	93%	69%

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Stroke Care	This category of evidence based measures assesses the overall quality of care provided to Stroke (STK) patients.		

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Hospital Results	Nationwide		Statewide	
			Top 10% Scored at Least:	Average Rate:	Top 10% Scored at Least:	Average Rate:
Anticoagulation Therapy for Atrial Fibrillation/Flutter	Ischemic stroke patients with atrial fibrillation/flutter who receive a prescription for an anticoagulant medication when being discharged from the hospital. This measure reports how often an anticoagulant medication was prescribed to ischemic stroke patients with atrial fibrillation/flutter when they are leaving a hospital. Atrial fibrillation is a heart rhythm disturbance that can allow blood clots to form within the upper chambers of the heart. If these blood clots break off and get into the bloodstream, a stroke can result. Anticoagulant medications or "blood thinners" help to prevent blood clots from forming.	 100% of 24 eligible Patients	100%	97%	100%	96%
Antithrombotic Therapy By End of Hospital Day 2	Ischemic stroke patients receiving an antithrombotic medication by the end of hospital day 2. This measure reports what percent of ischemic stroke patients receive an antithrombotic medication, such as aspirin, the day of or day after hospital arrival. Antithrombotic medications are beneficial because they reduce the tendency of blood to clot in blood vessels of the brain and improve survival rates.	 99% of 94 eligible Patients	100%	98%	100%	99%

The Joint Commission only reports measures endorsed by the National Quality Forum.

Measure Area	Explanation	Nationwide	Statewide
Stroke Care	This category of evidence based measures assesses the overall quality of care provided to Stroke (STK) patients.		

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Hospital Results	Compared to other Joint Commission Accredited Organizations			
			Nationwide	Average Rate:	Statewide	Average Rate:
Assessed for Rehabilitation	Stroke patients who have had their need for rehabilitation services assessed by a member of the rehabilitation team during their hospitalization. This measure reports what percent of stroke patients have a rehabilitation assessment completed or receive rehabilitation services during their hospitalization. Rehabilitation is a treatment(s) designed to facilitate the process of recovery from stroke or other injury, illness, or disease to as normal a condition as possible.	 100% of 167 eligible Patients	100%	99%	100%	99%
Discharged on Antithrombotic Therapy	Ischemic stroke patients who receive a prescription for an antithrombotic medication when discharged from the hospital. This measure reports how often an antithrombotic medication, such as aspirin, was prescribed to ischemic stroke patients when they are leaving a hospital. Antithrombotic medications are beneficial because they reduce the tendency of blood to clot in blood vessels of the brain and improve survival rates.	 100% of 115 eligible Patients	100%	99%	100%	100%
Discharged on Statin Medication	Ischemic stroke patients who receive a prescription for a statin medication when discharged from the hospital. This measure reports how often a statin medication was prescribed to ischemic stroke patients when they are leaving a hospital. Statin medications reduce the level of cholesterol circulating in the blood.	 100% of 97 eligible Patients	100%	98%	100%	98%

Compared to other Joint Commission Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Stroke Care	This category of evidence based measures assesses the overall quality of care provided to Stroke (STK) patients.		

Compared to other Joint Commission Accredited Organizations

Measure	Explanation	Hospital Results	Compared to other Joint Commission Accredited Organizations			
			Nationwide	Average Rate:	Statewide	Average Rate:
			Top 10% Scored at Least:		Top 10% Scored at Least:	
Stroke Education	Stroke patients who receive specific educational material about their condition. This measure reports what percent of stroke patients are given written instructions or educational material about their condition and care when they leave the hospital. Patient education about medicines, follow-up care after discharge, risk factors for stroke, warning signs to watch for, and activation of the emergency medical system if these signs occur is important in order to prevent another stroke.	 92% of 90 eligible Patients	100%	94%	100%	94%
Thrombolytic Therapy	Acute ischemic stroke patients who receive a medicine that breaks up blood clots (thrombolytic therapy) within 180 minutes of stroke symptom onset. This measure reports how quickly ischemic stroke patients were given a medication that breaks up blood clots (thrombolytic therapy). Breaking up blood clots increases blood flow to the brain. If blood flow is returned to the brain quickly during a stroke, the risk of brain damage and loss of physical function is decreased. The medicine that breaks up clots in the arteries and allows the return of normal blood flow is called thrombolytic therapy or "t-PA". It is important that this medicine be given quickly after an ischemic stroke is diagnosed.	 100% of 4 eligible Patients	100%	86%	100%	88%

National Quality Improvement Goals

Reporting Period: October 2014 - September 2015

Symbol Key

- This organization achieved the best possible results
- This organization's performance is above the target range/value.
- This organization's performance is similar to the target range/value.
- This organization's performance is below the target range/value.
- Not displayed

Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

Compared to other Joint Commission
Accredited Organizations

Measure Area	Explanation	Nationwide	Statewide
Venous Thromboembolism (VTE)	This category of evidence-based measures assesses the overall quality of care related to prevention and treatment of blood clots.	8	8

Compared to other Joint Commission
Accredited Organizations

Measure	Explanation	Hospital Results	Compared to other Joint Commission Accredited Organizations			
			Nationwide		Statewide	
			Top 10% Scored at Least:	Average Rate:	Top 10% Scored at Least:	Average Rate:
Intensive Care Unit (ICU) VTE Prophylaxis	Medical and surgical patients who were admitted or transferred to the ICU who received treatment to prevent VTE or a reason why they did not need preventive care was documented. This measure reports the percent of patients who received treatment to prevent blood clots or had documentation regarding preventive care at ICU admission or transfer.	8 98% of 127 eligible Patients	100%	97%	100%	98%
VTE Discharge Instructions	Patients with blood clots who were discharged to home, home with home health, home hospice or discharged/transferred to court/law enforcement on a blood thinning medication with written information. This measure reports the percent of patients who went home on warfarin who received instructions about compliance issues, dietary advice, follow-up monitoring and information about the potential for adverse drug reactions/interactions.	8 78% of 126 eligible Patients	100%	93%	100%	91%
VTE Patients with Anticoagulation Overlap Therapy	Patients with blood clots who received two medications for treatment. This measure reports the percent of patients who received an overlap of medication for a specific timeframe, or who went home on both medications.	8 92% of 182 eligible Patients	100%	94%	100%	95%

The Joint Commission only reports measures endorsed by the National Quality Forum.
