

Accreditation Quality Report

Welcome to the Joint Commission's Quality Report. We know how important reliable information is to you and your family when making health care decisions. This Quality Report will help you make the right decisions to meet your needs. Since 1951, the Joint Commission has been the national leader in setting standards for health care organizations. When a health care organization seeks accreditation, it demonstrates commitment to giving safe, high quality health care and to continually working to improve that care.

The Quality Report is only one way to determine whether a health care organization can meet your needs. Discuss this report with your doctor or with other professional acquaintances before making a care decision. In addition to the accreditation status of the organization, the Quality Report uses checks, pluses, and minuses in each of the following key areas to help you compare a health care organization with similar accredited organizations.

- National Patient Safety Goals - safety guidelines that target the prevention of medical errors such as surgery on the wrong side of the body and safe medication use.
- National Quality Improvement Goals - measures the care of patients with specific conditions such as heart failure or pregnancy.

Not all measures are relevant to or available for all types of health care organizations. The Joint Commission will add relevant measures of health care quality as more measures become available. Your comments are just as important to us. The content and format of the Quality Report will be updated from time to time based on changes in the health care industry and your suggestions. Please call Customer Service at 630-792-5800 or e-mail the Joint Commission at qualityreport@jointcommission.org with your comments and suggestions.

Mark R. Chassin, MD, MPP, MPH
President of the Joint Commission

Summary of Quality Information

Symbol Key

-  The organization has met the National Patient Safety Goal.
-  The organization has not met the National Patient Safety Goal.
-  The Goal is not applicable for this organization.

	Marking the Procedure Site	
	Performing a Time-Out	

Organization Commentary on the Quality Report

Commentary

Quality Report
 St. Louis Children's Hospital
 Organization Commentary on the Quality Report Org ID: 8394

Commentary:

As the seventh oldest pediatric hospital in the United States and the oldest west of the Mississippi, St. Louis Children's Hospital has been leading the way in children's health for 125 years. The hospital, in conjunction with its academic partner Washington University School of Medicine, recognized as a national leader in education, training, research and pediatrician scholarship, and is consistently ranked among the top five medical schools in the United States, has cared for patients from around the globe. National and international centers of excellence include the world's largest pediatric lung transplant program, the largest team of pediatric epilepsy specialists, the most comprehensive Cerebral Palsy (CP) Center in the country, and the largest selective dorsal rhizotomy surgical program for children with CP in the world. The hospital's focus on pain management is illustrated by its operational "Ouchless EU." St. Louis Children's Hospital scored in the top 5% of the national database in patient satisfaction as determined by Professional Research Consultants and has received their "Five Star Award" for overall quality of care for each year the award has been offered.

The accreditation process continues to be a valuable analysis of our multifaceted, quality-driven approach to pediatric medicine, ensuring the delivery of exceptional care to the population we serve. Our commitment to quality is organization-wide. It is demonstrated by various activities including Patient Safety Rounds led by our senior leadership group, by deploying unit-based pediatric pharmacists on all patient care units to improve medication accuracy, and by the use of a Patient Safety Hotline which allows staff to anonymously report unsafe conditions or practices.

We value the Joint Commission's strong emphasis on patient safety and high expectations for organized operational processes. Along with this systematic and sensitive approach to providing care to the children and families we serve, our goal is to unite our medical expertise with a generous dose of tenderness to make the healthcare experience as pleasant and comfortable as possible. "Doing What's Right for Kids" is our mission and exemplifies our pledge to meet and exceed compliance with all regulations and accreditation standards of care.
