

# Accreditation Quality Report

Welcome to the Joint Commission's Quality Report. We know how important reliable information is to you and your family when making health care decisions. This Quality Report will help you make the right decisions to meet your needs. Since 1951, the Joint Commission has been the national leader in setting standards for health care organizations. When a health care organization seeks accreditation, it demonstrates commitment to giving safe, high quality health care and to continually working to improve that care.

The Quality Report is only one way to determine whether a health care organization can meet your needs. Discuss this report with your doctor or with other professional acquaintances before making a care decision. In addition to the accreditation status of the organization, the Quality Report uses checks, pluses, and minuses in each of the following key areas to help you compare a health care organization with similar accredited organizations.

- National Patient Safety Goals - safety guidelines that target the prevention of medical errors such as surgery on the wrong side of the body and safe medication use.
- National Quality Improvement Goals - measures the care of patients with specific conditions such as heart failure or pregnancy.

Not all measures are relevant to or available for all types of health care organizations. The Joint Commission will add relevant measures of health care quality as more measures become available. Your comments are just as important to us. The content and format of the Quality Report will be updated from time to time based on changes in the health care industry and your suggestions. Please call Customer Service at 630-792-5800 or e-mail the Joint Commission at [qualityreport@jointcommission.org](mailto:qualityreport@jointcommission.org) with your comments and suggestions.

Mark R. Chassin, MD, MPP, MPH  
President of the Joint Commission

## Summary of Quality Information

### Symbol Key

- This organization achieved the best possible results.
- This organization's performance is above the target range/value.
- This organization's performance is similar to the target range/value.
- This organization's performance is below the target range/value.
- This Measure is not applicable for this organization.
- Not displayed

| Accreditation Programs | Accreditation Decision | Effective Date | Last Full Survey Date | Last On-Site Survey Date |
|------------------------|------------------------|----------------|-----------------------|--------------------------|
| Hospital               | Accredited             | 1/28/2017      | 1/27/2017             | 3/10/2017                |

### Accreditation programs recognized by the Centers for Medicare and Medicaid Services (CMS)

Hospital

| Advanced Certification Programs | Certification Decision | Effective Date | Last Full Review Date | Last On-Site Review Date |
|---------------------------------|------------------------|----------------|-----------------------|--------------------------|
| Primary Stroke Center           | Certification          | 11/11/2016     | 11/10/2016            | 11/10/2016               |

| Certified Programs | Certification Decision | Effective Date | Last Full Review Date | Last On-Site Review Date |
|--------------------|------------------------|----------------|-----------------------|--------------------------|
| Asthma, Pediatrics | Certification          | 3/19/2016      | 3/18/2016             | 3/18/2016                |

### Other Accredited Programs/Services

- Hospital ( Accredited by American College of Surgeons-Commission on Cancer (ACoS-COC))

### Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

## 2017 National Patient Safety Goals

### Symbol Key

-  The organization has met the National Patient Safety Goal.
-  The organization has not met the National Patient Safety Goal.
-  The Goal is not applicable for this organization.

For further information and explanation of the Quality Report contents, refer to the "Quality Report User Guide."

### Hospital

| Safety Goals   | Organizations Should                                       | Implemented   |
|--|--|---|
| Improve the accuracy of patient identification.                              | Use of Two Patient Identifiers                             |    |
|  | Eliminating Transfusion Errors                             |    |
| Improve the effectiveness of communication among caregivers.                 | Timely Reporting of Critical Tests and Critical Results    |    |
| Improve the safety of using medications.                                     | Labeling Medications                                       |    |
|  | Reducing Harm from Anticoagulation Therapy                 |    |
|  | Reconciling Medication Information                         |    |
| Reduce the harm associated with clinical alarm systems.                      | Use Alarms Safely on Medical Equipment                     |    |
| Reduce the risk of health care-associated infections.                        | Meeting Hand Hygiene Guidelines                            |   |
|  | Preventing Multi-Drug Resistant Organism Infections        |  |
|  | Preventing Central-Line Associated Blood Stream Infections |  |
|  | Preventing Surgical Site Infections                        |  |
|  | Preventing Catheter-Associated Urinary Tract Infection     |  |
| The organization identifies safety risks inherent in its patient population. | Identifying Individuals at Risk for Suicide                |  |
| Universal Protocol   | Conducting a Pre-Procedure Verification Process            |  |
|  | Marking the Procedure Site                                 |  |
|  | Performing a Time-Out                                      |  |

| Measure   | Explanation   | Compared to other Joint Commission Accredited Organizations   |                          |         |                          |         |
|---|---|---|--------------------------|---------|--------------------------|---------|
|   |   | Hospital Results  | Nationwide               | Average | Statewide                | Average |
|   |   |   | Top 10% Scored at Least: | Rate:   | Top 10% Scored at Least: | Rate:   |
| Assessment of violence risk, substance use disorder, trauma and patient strengths completed - Adult (18-64 years) | This measure reports the number of adults age (18-64 years) screened for violence risk to self and others, substance and alcohol use, psychological trauma history and patient strengths. Screening for violence risk to self determines if patients are likely to harm themselves. Screening for violence risk to others determines if patients are likely to harm others. Screening for substance and alcohol use determines if patients need help for their use. Screening for psychological trauma history determines if patients have experienced terrible events in their lives which have left them fearful or anxious and unable to handle their feelings. Screening for patient strengths identifies positive things such as family support, a steady job, housing, etc. which are used to help the patient recover. | <br>98% of 168 eligible Patients | 100%                     | 94%     | 100%                     | 92%     |

The Joint Commission only reports measures endorsed by the National Quality Forum.

## National Quality Improvement Goals

Reporting Period: January 2016 - December 2016

### Symbol Key

-  This organization achieved the best possible results
-  This organization's performance is above the target range/value.
-  This organization's performance is similar to the target range/value.
-  This organization's performance is below the target range/value.
-  Not displayed

### Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

| Multiple Antipsychotic Medications at Discharge with Appropriate Justification Overall Rate        | This is a proportion measure. A proportion measure is a measure which shows the number of occurrences over the entire group within which the occurrence should take place. The numerator is expressed as a subset of the denominator. This measure reports the overall number of patients discharged on two or more antipsychotic medications. Antipsychotic medications are a group of drugs used to treat psychosis. Psychosis is a mental illness that markedly interferes with a person's capacity to meet life's everyday demands.   | 3<br>78% of 9 eligible Patients <sup>3</sup>                | 100%                     | 61%           | 100%                     | 49%           |
| Multiple Antipsychotic Medications at Discharge with Appropriate Justification Children Age 1 - 12 | This measure reports the number of patients age 1 through 12 years discharged on two or more antipsychotic medications for which there was an appropriate justification. Antipsychotic medications are a group of drugs used to treat psychosis. Psychosis is a mental illness that markedly interferes with a person's capacity to meet life's everyday demands. Appropriate justifications include previous attempts to control psychosis with one antipsychotic medication, a plan to reduce the number of antipsychotic medications to one antipsychotic medication or the addition of an antipsychotic medication when the patient is also being treated with Clozapine. | 3<br>----   | 100%                     | 63%           | 100%                     | 73%           |

- This organization's performance is below the target range/value.
- Not displayed

### Footnote Key

1. The Measure or Measure Set was not reported.
2. The Measure Set does not have an overall result.
3. The number of patients is not enough for comparison purposes.
4. The measure meets the Privacy Disclosure Threshold rule.
5. The organization scored above 90% but was below most other organizations.
6. The Measure results are not statistically valid.
7. The Measure results are based on a sample of patients.
8. The number of months with Measure data is below the reporting requirement.
9. The measure results are temporarily suppressed pending resubmission of updated data.
10. Test Measure: a measure being evaluated for reliability of the individual data elements or awaiting National Quality Forum Endorsement.
11. There were no eligible patients that met the denominator criteria.

| Thrombolytic Therapy | Acute ischemic stroke patients who receive a medicine that breaks up blood clots (thrombolytic therapy) within 180 minutes of stroke symptom onset. This measure reports how quickly ischemic stroke patients were given a medication that breaks up blood clots (thrombolytic therapy). Breaking up blood clots increases blood flow to the brain. If blood flow is returned to the brain quickly during a stroke, the risk of brain damage and loss of physical function is decreased. The medicine that breaks up clots in the arteries and allows the return of normal blood flow is called thrombolytic therapy or "t-PA". It is important that this medicine be given quickly after an ischemic stroke is diagnosed. | <br>100% of 6 eligible Patients | 100%                                | 90%           | 100%                               | 94%           |
